The following need to be created by tomorrow's class.

- ✓ Go to the course website and fill out the course questionnaire: https://www.hscs4all.com/

- ✓ Create a studio.code.org account. Your username must include your last name and first initial of your first name and school email. You should follow the camel casing standard which means jam all words together and start each new word with a capitol letter. NO SPACES! For example, my name would look like WilsonD. Then on the course website (hscs4all), use the following codes (determined by the course section that you are in)

  - ○ 1st Period – https://studio.code.org/join/SKYTTH
  - ○ 5th Period – https://studio.code.org/join/LHDSGJ
  - ○ 8th Period - https://studio.code.org/join/YBLCHK

- ✓ Create a PiktoChart Account. You will be required to use this software to make the required infographics in this course.

- ✓ Download the LOOM extension for your CHROME browser. You are required to record your working applications in this course.

- ✓ Create your AP Digital Portfolio account by clicking the link below. Be sure to use your existing AP account if you have already taken an AP course. If you have not taken a course, then create a new account. DO NOT Worry about entering your AP number just yet.
  http://myap.collegeboard.org
  Use the following codes to join the correct class section:

Course Name	Section Name	Teacher Name(s)	Active Join Code
AP Computer Science Principles	Period 1	Deborah Wilson	9QJP4M
AP Computer Science Principles	Period 5	Deborah Wilson	XEAXWY
AP Computer Science Principles	Period 8	Deborah Wilson	WPZYM3
